

Strengthening data system to respond to UIS questionnaires

Discussion

Key issues and challenges of data at the national level

Conducive environment

- Lack of legal frameworks, clarity in mandates for data collection and compilation,
- Adequate resources, and
- ICT infrastructure.

Quality data and Data Gaps in various data sources

- Fragmented education databases and data management systems
- Large gap in data with which to monitor inequalities in education
- Lack of data by levels of education
- Timeliness and coverage of data from different sources

Coordination

- A culture of data sharing among various governmental agencies is lacking
- Lack of data compilation tools and skills from various sources

1. **Did your country implement any data system improvement project in recent year(s)?**
2. **How can such project improve your country's data submission for international comparison?**
